Md. Ekhlas Ali Mridha

Phone: +8801743200784
Email: ekhlasmridha@gmail.com
LinkedIn: https://linkedin.com/in/shimul-mridha-802586154

Education

Shahjalal University of Science & Technology
   - Studying B.Sc. in Software Engineering
(Final year student)

Participation

- BUP TECHSURGENCE 2019(Hackathon Participant)
- Sust LICT Techfest 2019 (Hackathon Participant)
- IUT Techfest 2019(Hackathon Participant)

Language & Technology

Programming Language:
- C
- C#
- Java
- JavaScript
- HTML
- CSS
- Python

Database: MongoDB, MySql.
Framework and library: Angular, ASP.NET core (Web API).

Experience

Internship: Worked as intern at SELISE for 6 months
During this period,
- Trained in backend and frontend , and worked on some real world projects on frontend section using Angular 8 and AngularJs.

Projects

- **Hotel-Booking:** I have developed this project for a client where I am working as a freelancer. Hotel booking system is to book a room with proper user details and booking timeline representation which is only developed for the hotel authority to track their record.
  It's a web API based project where backend is developed with ASP.NET core and MySql database. In the you side there is a booking timeline representation which is closed to gantt chart to represent the room booking date from start to end.

  Github repository: https://github.com/EkhlasMridha/booky-be

- *Mafia-Bird:* It's a shooting and adventure game developed with JAVA jswing.
  GitHub: https://github.com/EkhlasMridhaShimul/Mafia-Bird

- **I-Control:** It's an android + desktop app developed with java. It's work like a remote control for a desktop and capable of sharing screen of a desktop to it's connected android app. I have developed it as my university project.
